Leetcode May Challenge DAY: 02

1. Python

class Solution:

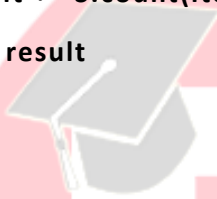

```
def numJewelsInStones(self, J: str, S: str) -> int:
```

```
    result=0
```

```
    for item in list(J):
```

```
        result += S.count(item)
```

```
    return result
```

2. C++

```
class Solution {  
public:  
    int numJewelsInStones(string J, string S) {  
        int res=0;  
        for(auto i:J)  
            res+=count(S.begin(),S.end(),i);  
        return res;  
    }  
};
```
